

ANNEX I OF THE QUALITY AND ENVIRONMENT MANUAL

QUALITY AND ENVIRONMENT POLICY

Revision: 2 / Effective from: 24 March 2017

Estructuras Metálicas Metasol, S.L. was founded in 2007 by its manager, Juan Pablo Velázquez, with the aim of providing advanced solutions in the fields of design, manufacture and assembly of metal structures and mechanical assemblies.

The organisation's Quality and Environment Policy is based on the following commitments:

- **Customer focus.** To meet agreed requirements and customer expectations efficiently and effectively.
- **Promotion of innovation.** To promote innovation in all fields, with the aim of designing technologically advanced products and unique structures.
- **Environmental protection.** Reducing the negative environmental impact of our activities, prioritising pollution prevention, rational use of resources and minimisation of waste generated.
- **Staff involvement.** Raising staff awareness of the importance of their activities in the quality of products and services, which must be carried out at all times in an environmentally friendly manner.
- **Compliance with legislation.** Ensuring compliance with legal and other requirements applicable to the organisation. In particular, compliance with Construction Products Regulation 305/2011.
- **Prioritising safety at work.** Taking the necessary safety measures to prevent accidents and incidents that could affect the health and safety of workers.
- **Continuous improvement.** Ensure improvement in processes that certify the conformity of the quality and environmental system.
- **Commitment to society.** Communicate the Quality and Environmental Policy to customers, suppliers and the general public to make our commitments known and thus reinforce them.

In Villanubla, on 24 March 2017

Juan Pablo Velázquez
Manager
